500 Mbps Powerline Ethernet Bridge (BV-210C)

## Before Getting Started

Make sure that router is connected to the Internet.

Please refer to below suggestions for the best performance.

## Establish Powerline Network

### Step 1

Plug the PLC adapter to a AC outlet and connect to router or broadband modem with an Ethernet cable (provided)

### Step 2

Plug another PLC adapter in AC power outlet and connect it with networked device such as Blu-ray player, Gaming console, Smart TV, or Set-Top Box.
