#### Safety Instructions

This product has been engineered and manufactured to assure your personal safety. However, improper use can result in potential electric shock or fire hazards. In order not to defeat the safe-guards incorporated in this instrument and its accessories, please adhere to the following instructions when installing, operating and servicing.

#### **Power Source Warning**

- A marking label attached on the rear side of the adapter (supplied) indicates the correct power source for this equipment. Operate this product only from an electrical outlet with the voltage and frequency indicated on the product label. Incorrect power source may result in a risk of electric shock or fire. If you are uncertain of the type of power supplied to your home, consult your local power company or appliance dealer.
- Only use the power cord and adapter provided by the manufacturer. Internal component may be damaged if you use a different adapter to power this product. To avoid electric shock and fire hazard, match the plug and outlet connections carefully, then fully insert. If the plug fails to fit the outlet, please contact an electrician to update your power outlets.
- Do not overload electrical outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock. And to prevent power cord damage, arrange all power cords so that people cannot walk on the cords. Do not place objects on the cords.
- Place this product in a location that is close enough to an electrical outlet and where the power cord is easily accessible to be disconnected from the wall outlet.

#### Usage Warning

- To reduce the risk of electric shock, do not remove the cover or attempt to disassemble this product. There are no user-serviceable parts inside.
   Please refer all servicing to qualified service personnel.
- Protect this product from foreign objects. Never push object of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock.
- Do not expose this product to liquids, rain or moisture.
- This product has ventilation openings that protect it from overheating. Never block or cover these openings. And do not place this product near heat sources such as radiators, heat registers, stoves or other products producing heat.
- Before cleaning or wiping this product, make sure your power cord is already unplugged from the electrical outlet. Only use damp cloth to clean this product, and never use a liquid cleaner or an aerosol cleaner.
- During a thunderstorm, or when this product is unused for long periods of time, unplug power cord from the wall outlet. This will prevent damage to the product due to lightning and power-line surges.

#### Service Warning

- Refer all servicing to qualified service personnel. For damage that requires service, please unplug your power cord from the AC outlet first, and contact your dealer or servicing personnel to obtain service for the following conditions.
  - If there is damage to the adapter, power cord or plug.
  - If liquid enters this product.
  - If you drop this product, a heavy object falls on this product, or damage occurs to the cover of this product.
  - If you expose this product to rain or water.
  - If this product does not operate normally by following the operating instructions.
  - If this product exhibits a distinct change in performance.

#### Caution

Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

# 1 Introduction

The Product is a high-definition multimedia player and streamer connecting to the external USB hard drives and the HD TV, bringing PC and internet entertainment to the living room. It supports most video/audio/image formats so you do not need to convert downloaded media to another format. You can plug in your USB devices to the Product to play music, movies and pictures on TV by following the on-screen display (OSD) menu. The Product can also access the shared folders on the remote PCs through the intranet (local area network) and play the digital media files there on your TV. It also supports high-definition media playback with HDMI output.

# Package Content

Please make sure the following items are included within your new THE PRODUCT package. If any item is missing or damaged, please email us at <u>service@brite-view.com</u>. THE PRODUCT might not be compatible with some accessories made by other manufacturers. We highly recommend that you use only the specific accessories we suggest.

6	S/PDIF		Connects the Product to a display that has an	
			optical digital audio port, using an optical digital	
			audio (also called S/PDIF) cable.	

# **Remote Control**

POWER	Press to turn on the Product; press again to switch to			
	stand-by mode.			
MUTE	Press to mute the sound.			
Numeric Buttons	0-9 number keys for selecting desired options.			
GOTO	Video/movie chapter and time point selection.			
	Display the information of media files while in play mode.			
BACK	Return to the previous display.			
VOL + / -	Increase/decrease the volume.			
СН + / -	Reserved keypad for further application.			
НОМЕ	Hot key to the main OSD menu.			
REPEAT A-B	Press once to mark desired repeat point A; press again to			
REPEAT A-D	mark desired repeat point B; press yet again to turn this			
	feature off			
REPEAT	Enable/disable repeat of file playback.			
ANGLE	Switch DVD display angles.			
DVD MENU	Press to pop up the special function list on different mode.			
▲ <b>▼  </b>	Navigate through menu screen or media libraries.			
ОК	Confirm or select.			
ASPECT	Adjust aspect ratio			
SETUP	Enter setup menu			
SUBTITLE	Switch subtitle files.			
	Play/pause selected file.			
	MULTI-FUNCTION: Refer to the instructions in the screen.			
	Return to previous file. / Go to next file.			
	Stop playback and return to the previous screen.			
	Play films in slow mode.			
L/R	Enable/disable Left/Right speaker.			
AUDIO	Switch multilingual outputs.			
ZOOM	Zoom video or image display on screen.			

#### **Cable Connections**

Match the cables to the connections on your TV or display. Your choices of connection include:

HDMI For both audio and video output	
RCA Cable	For composite video (yellow) and stereo
	audio (white and red)
S/PDIF	For audio output

#### **Internet Connections**

#### Connect the Product to the home network through wired LAN

## (Option A) or wireless LAN (Wi-Fi 802.11 b/g/n) (Option B)

A. Plug the Ethernet cable to the "LAN" jack on the rear panel of The

Product, for wired Internet connection. The Product will detect the network automatically.

B. If you have the optional wireless USB dongle we approved, it is possible to connect The Product to the network wirelessly using Wi-Fi 802.11 b/g/n. You need to plug the USB dongle into one of the USB port on the front panel of the Product and connect to the internet through wireless IP sharing router. You may need to know your wireless AP, name of the router, and encryption keys in order to set up correctly.

#### **Connect USB Devices**

#### **Power Cord Connection**

Plug one end of the power cord into the back of the Product and the other end into a power outlet. The Product will start automatically without pressing any other button once the power is connected.

#### Switch your TV Input/Source

After choosing the desired video and audio connection, you need to select appropriate video input mode using the remote control for your TV/display to switch to the corresponding video output by pressing the **Input/Source** button on the remote control.

Direction Keys +	To access <b>SETUP</b> on the main menu.
Direction Keys + or	Enter "Network" setup menu.
Direction Keys + or	Select the item for adjustment.
Ĵ	Go back to the previous page.

If your wired network equipment such as the IP Sharing router or AP (Access Point), uses DHCP to assign IP address, by default the Product will automatically request the IP and other related information to set up The Product over the network in **DHCP** mode (under **Setup> Network >Wired)**. If your network does not have DHCP server, switch to the Static IP mode (under **Setup> Network >Wired)** and set up various parameters manually. If you have a compatible wireless USB dongle, and have already set up the wireless router/AP according to the instructions that come with the dongle, please enter **Setup> Network> Wireless** mode to input the WEP or WPA keys.

	BT & Samba Security	Off

Item	Options
Direction Keys	Select "BT & Samba Security" on the Network
+ ОК	menu.
Direction Keys +	Off/ On

# **File sharing Configuration**

To activate this feature, please make sure:

- The Product is connected to the network;
- The network is properly set up. For more information on this part, please refer to "Step 2" in "Setting up The Product" section, and "Network" under "Setup Menu".

To allow the Product to access folders on your computer, you need:

- 1) The Product already connected to the network
- 2) to designate the folders/files on your PC as shared resources.

Please refer to Microsoft's official website:

<u>http://www.microsoft.com/windowsxp/using/networking/setup/home</u> <u>net.mspx</u> to see the initial and detailed process of Home Network Setup in Windows XP. Please refer to the following instructions to allow the Product to access the shared folders on the remote PC.

- Step 1: Right click on the folder to be shared and select **Sharing and Security**.
- Step 2: If this is the first time you intend to share a folder, Windows XP will prompt a warning message, urging you to use the Network Setup Wizard for safety purpose. Choose to either run the Wizard or do it yourself. XP will display another warning. If you want the firewall enabled, select Use the wizard to enable file sharing. Otherwise, select enable file sharing.

**Caution**: File sharing may lead to security problems since, by definition, it gives other users access to the content of a part of the hard drive. As a result, it is essential that you share only folders for which it would not be extremely important if their contents are

Step 3: You may now specify a "**Share Name**", which will be used for users on the network to access the shared folder. The icon of the shared folder will be changed to showing a hand holding the folder.

If your operating system is Windows Vista, please refer to the following instructions:

(1) Open the **Control Panel** and then open **Network and Sharing Center**.

(2) Click the down arrow to the right of File Sharing to expand it.(3) Click Turn on file sharing and then click Apply.

You may also refer to **Setup** menu on the OSD screen of The Product to select wired or wireless connection.

#### File Sharing Configurations (With Windows Vista)

File sharing involves making the media content of one or more files / folders (on your PC) available through the network. By "enabling" this file sharing, you can view these files / folders (on your PC) to be accessed / viewed on your The Product (on the same network).

Caution: File sharing may lead to security problems since, by definition, it gives other users access to the content of a part of the hard drive. As a result, it is essential that you share only folders for which it would not be extremely important if their content were revealed (or destroyed), Furthermore, you are strongly advised against sharing a whole partition of your hard drive. This operation is specifically discouraged if you do not trust the other network users!

Enable "File Sharing" under Windows Vista

- ✓ On your PC, Click Start, right-click Network, and then click Properties..
- ✓ A new Window titled "Network and Sharing Center" pops up.
- ✓ In the "Sharing and Discovery" section of the Network and Sharing Center window, click the down arrow next to File sharing.
- ✓ Within the File sharing settings, click Turn on file sharing, and then click Apply.
- $\checkmark$  To enable public folder sharing, do the following:
  - In the Sharing and Discovery section of the Network and Sharing Center window, click the down arrow next to Public folder sharing.
  - Within the Public folder sharing settings, click "Turn on sharing so anyone with network access can open, change, and create files".
  - Click Apply.

Once the "File Sharing" is enabled in Windows-Vista,

- ✓ Click Start, and then click Computer.
- ✓ In the Computer window, navigate to the folder containing the folder that you want to share.
- ✓ Right-click the folder that you want to share, and then click Share.
   The File Sharing window is displayed.
- ✓ Use the File Sharing window to select the Guest or Everyone account. This is equivalent to simple file sharing in Windows XP.
- $\checkmark$  When complete, click Share, and then click Done.

#### File Sharing in Windows 7

This instruction is based on Windows 7 professional version , the other versions are similar with this.

#### 1. Click(Start)->(Control Panel)->(Network and Sharing Center)

#### 2. Enter "Change advanced sharing setting"

3. Set sharing options as above images.

## > USB Media

The Product searches and plays all available photos, music and video files on the external USB device.

Note: Depends on the specification of USB that each USB port provide 0.5A to USB device, please use with extra power-provided USB device if the USB device needs more electricity.

## > Network Media

Connect The Product to your PC using an Ethernet cable. By connecting your PC to the Local Area Network, you can play the media files on the remote PCs. Before you do so, please confirm the network settings and file-sharing setup has been finished successfully. (See Chapter 3 for more information.)

Note: The limitation on the HD video content playback over the network:

The HD video quality may suffer when the video is streamed over the network. This is caused by intranet environment limitations. As a result, users might sometimes experience unsmooth video playback. Therefore, we recommend a wired Intranet for best playback quality, although the transmission over WiFi and PLC is supported.

## > UPnP

UPnP (Universal Plug and Play) allows you to connect UPnP-enabled devices (available on the network) and share their content with the media player. When you enter UPnP application, The Product will automatically detect the PCs inside LAN. Please make sure that your PC supports Windows Media Player Version 11 and higher. Due to compatibility issue, some PCs may not support UPnP.

# > Playlist and Album Setting

You can save your favorite music to playlist or photos to album when you are viewing files in USB device.

Remote	Description
A + OK	Save to Playlist or Album

Note: The function only could be used with USB device.

# Audio

Remote	Description	
Direction Keys +	Enter "Audio" setup menu.	
Direction Keys +	Select the item for adjustment.	
Direction Keys +	Confirm the change.	
	Go back to the previous page.	
Item	Options	
Night Mode	Off/On/Comfort	
HDMI Output	LPCM	
	LPCM Multi-Ch	
	RAW	
SPDIF Output	LPCM	
	RAW	

#### Note: LPCM / RAW Mode

LPCM mode means decoding the audio then and down-mixing it to 2 CH output.

RAW mode means passing the audio data through to the amplifier for audio decoding.

LPCM mode: Choose it when the content supports LPCM Multichannel.

Note: "AUDIO SETUP-"Night Mode" (aka Dynamic Range Control) When the Night Mode is enabled the sound level of compatible audio soundtracks will be dynamically compressed. Dynamic range control (DRC) increases low-level audio content (such as the dialog in the movies), making it easier to be heard at low volume levels while reducing the intensity of higher-level audio content at the same time.

"When you're listening to movie dialogue late at night and have to turn down the volume during loud scenes, the dynamic range suffers and you may miss some dialogue and other sounds. With the Night Mode on, you can reduce the volume but still enjoy proper tonal balance and dynamic range."

# Video

Remote	Description	
Direction Keys +	Enter "Video" setup menu.	
Direction Keys +	Select the item for adjustment.	
Direction Keys +	Confirm the change.	
Ð	Go back to the previous page.	
Item	Options
